**Vision** - GHHI offers integrated health, safety, and energy efficiency interventions in low- to mod-income homes. GHHI maximizes public and private investments for 6 major benefits:

- Government innovation in service delivery and cost savings
- Measurable improvements in health, economic and social outcomes for children and families
- Development of community-based “green collar” jobs and social enterprise
- Creation of stable and sustainable green and healthy homes in low-income neighborhoods
- Wealth retention and family economic security
- Tool development to implement and finance system changes

**Concept** -

**Elements of the GHHI Model** -

- Asset Mapping
- Green Jobs Training and Workforce Development
- Coordinator / Outcomes Broker™
- Learning Network
- Single Portal Intake / Triage System
- Comprehensive Assessments
- Public and Philanthropic Leadership
- Integrated Housing Interventions and Braiding Funding Streams
- Resident Education
- Data and Information Sharing
- Cost Benefit Analysis
- Regulatory and Policy Changes

**Integrated Housing Interventions** -

**Green**

- Energy Audit
- Weatherization
- Insulation
- Energy Efficient Appliances
- Reducing Air Infiltration and Leaks
- Energy Efficiency Measures
- Energy Efficiency Education

**Health and Safety**

- Health and Safety Assessment
- Lead Hazard Reduction
- Asthma Trigger Reduction
- Integrated Pest Management
- Trip and Fall Hazard Reduction
- Fire and Injury Prevention Measures
- Health and Safety Education

**GHHI Sites:** Atlanta, Baltimore, Buffalo, Chicago, Cleveland, Denver, Detroit, Dubuque, Flint, Jackson, New Haven, Oakland, Philadelphia, Providence, San Antonio and Cowlitz and Spirit Lake Tribes
With support from HUD, CDC, DOE, the Federal Healthy Homes Work Group and the Council on Foundations, the Coalition to End Childhood Lead Poisoning provides technical support:

- Developing local Learning Networks
- GHHI Compact around standards, principles, and practices
- Best practices and training around assessments, triage, and integrated interventions
- Gap analysis and resource identification
- Providing Comprehensive Assessment Tool
- Aiding in funding applications (federal, local, philanthropic, private)
- Identifying and supporting a local coordinator
- Identifying and overcoming barriers to integrated housing interventions
- Shared data platform and evaluation support
- Webinars and peer learning site
- Engaging philanthropic investment
- Training and support for workforce development programs

Workforce Development
- Design and training on an integrated training and workforce development pathway
- Trained persons in green and healthy assessments and interventions
- Low-skilled workers and job seekers enrolled in GHHI workforce training efforts have earned industry related certifications

National Work
- US Conference of Mayors adopted resolution on the GHHI platform at 2011 and 2012 Annual Conferences, National League of Cities incorporating GHHI into platform
- Produced “Identified Barriers and Opportunities to Make Housing Green and Healthy Through Weatherization: A Report from Green and Healthy Homes Initiative Sites”
- National Dialogue with the National Academy of Public Administration (NAPA) that resulted in the report “Achieving Green and Healthy Homes and Communities in America”
- Developed designation criteria for next generation sites (over 50 localities interested in GHHI)
- HUD’s Safe and Healthy Homes Investment Partnership (SHHIP) criteria modeled after GHHI

Philanthropy and Investment
- Corporate and philanthropic foundations (over 30) commitments
- Partnerships with Council on Foundations, CF Leads, The Funders’ Network for Smart Growth and Livable Communities, Living Cities, and other philanthropic groups
- Developing new funding streams toward Healthy Homes interventions based on present value health savings (Center for Medicare and Medicaid Innovation)

Evaluation
- Working with Harvard University Schools of Public Health, Business, and Kennedy School of Government for multi-disciplinary evaluation
- Partnering with Urban Institute and MacArthur Foundation for cost benefit analyses

Development
- Financing tools and new social enterprise models
- Software programs for integrated assessments, triage, resource identification and assignment

GHHI Sites: Atlanta, Baltimore, Buffalo, Chicago, Cleveland, Denver, Detroit, Dubuque, Flint, Jackson, New Haven, Oakland, Philadelphia, Providence, San Antonio and Cowlitz and Spirit Lake Tribes
